

What We Do

*We provide total eye care for animals
- from routine consultations and eye
certificates, to the latest techniques
in surgery and diagnostics.*

We are highly experienced in managing diabetic, brachycephalic and elderly patients, and have special protocols in place for their treatment and surgeries.

Our main clinic is based in Mulgrave, but for your convenience we regularly travel to Frankston, Geelong, Essendon, Bundoora, Bendigo, Wodonga and Gippsland to see cases.

Please let our friendly nurses know where you would like to be seen when you are booking your appointment. We keep regular business hours throughout the week, with late consultations available on Tuesday nights till 7pm. We are also available to see emergencies out of hours as required.

Welcome to Melbourne EyeVet!

Our caring and compassionate veterinary ophthalmologists have over 35 years combined experience, so you can feel confident that your pet is in the best hands with us.

About Us

Melbourne EyeVet was established in 2016 with the philosophy to provide dignified, high quality service to clients and their pets throughout Victoria.

Dr Anu O'Reilly BSc, BVMS, MANZCVS, Cert VOPh, FANZCVS

Specialist in Ophthalmology

Dr Anu O'Reilly has over 15 years experience in veterinary ophthalmology. She has expertise in all areas of ophthalmology with a special interest in glaucoma, corneal surgeries and equine ophthalmology. She regularly sees horses at the South Eastern Equine Hospital. She also works closely with Melbourne Zoo and Werribee Open Range Zoo.

Dr Chloe Hardman BVSc (Hons), MVS, MANZCVS, FANZCVS

Specialist in Ophthalmology

Dr Chloe Hardman has over 20 years experience in veterinary ophthalmology. She has a special interest in eyelid reconstructive surgery and cataract surgery. She enjoys working closely with registered dog breeders to assist them in eradicating inherited eye diseases from their breeds.

Dr Hayley Volk BVSc, MANZCVS

Registrar in Ophthalmology

Dr Hayley Volk has completed her membership in Small Animal Medicine. She has worked in numerous ophthalmology centres including SASH in Sydney and Davies Veterinary Specialists in the UK.

Ophthalmic Nurses: Bron Williams, Georgina Williams, Alyssa Lentini, Kelly Richardson & Elisha Paglia

What Can You Expect

- **Two experienced** registered veterinary ophthalmologists and an experienced registrar will diagnose your pet's eye disease and determine the best treatment.

- A highly experienced team **caring** for your pet - Dr Anu and Dr Chloe have a combined 35 years of veterinary ophthalmic experience and their nurses have had specialised training in veterinary ophthalmology.

- A **thorough explanation** of your pet's condition and all the options available to you. We want you to be able to make an informed decision that you feel comfortable with and that is best for your pet.

- We also cater for our feline patients with a dedicated cat waiting area, cat ward and cat consultation room.

- Appointments are available for horses in Narre Warren by arrangement.

- The **most up-to-date** equipment and treatment options - our specialists regularly attend conferences and seminars to further their knowledge, and our equipment includes a state-

of-the-art operating microscope, a brand new cataract machine and the latest in ultrasound technology and two Electro-retinographs.

- **Knowledge and support** for pedigree dog breeders. We are involved in the AVA-ANKC Australian Canine Eye Scheme, and both ophthalmologists have a special interest in helping breeders to understand and prevent inherited eye conditions in pedigree dogs.

- A warm and **welcoming environment** for owners' and pets. We know it can be very stressful when your pet has an eye injury or disease. Our team is made up of genuine animal lovers who understand how you are feeling. We will always treat your pet with the love and respect we would want our own pets treated with.

- Unmatched client support. If you have any concerns or questions about your pet's eye condition, we want you to contact us. We want you to have peace of mind about the treatment your pet is receiving and an understanding of what you can expect for your pet's recovery.
